

EIKI LCD PROJECTOR OPTICAL GLASS WARRANTY

This warranty is valid for EIKI brand LCD projectors purchased in the United States or in its territories from Authorized EIKI dealers. This warranty applies only to the original purchase sale. The original dated bill of sale, sales slip or proof of purchase must be submitted to an Authorized Service Dealer or Authorized Regional Service Center at the time warranty service is requested.

Subject to the obligations above and exclusions below, Eiki International, Inc. warrants all polarized optical glass against defects in material and workmanship for a period of 90 days of ownership or 500 hours of use – whichever occurs first. The warranty period commences on the date of purchase.

This warranty does not cover any glass that has been tampered with drop damaged, or burned due to excessive heat caused by dirt or improper installation and/or due to lack of proper maintenance as recommended in the owner's manual.

This warranty will only cover optical glass that will cause the image to have artifacts or color fade (image washout).

Note *If bad optical glass is not replaced, there is the possibility of damage to the LCD panel(s). If glass is declined on an estimate for replacement and causes a LCD panel to burn, the LCD panel will not be covered under its 3 year warranty.
